

EDUCATION

Bachelor of Computer and Information Science
Major in Cybersecurity & Networks — AUT
Expected Graduation: 2027 | GPA: 7.41/9.0
Relevant Coursework: Network Security, Systems Administration, Internet & Networking.

SKILLS

AI & Automation

- Claude Code & Codex — directing AI-assisted architecture, implementation, and debugging
- MCP (Model Context Protocol) — designing and integrating AI-driven tools and agents
- Prompt engineering & AI workflow design
- Reviewing and validating AI-generated code for correctness and security
- API integration (Gmail, Google Calendar, LLM APIs)

Cybersecurity/Networking

- Authentication & role-based access control (RBAC)
- VPN setup and configuration
- DNS, TCP/IP fundamentals
- Network monitoring

Technical/Tools

- Linux, Cloud/Web Hosting
- System Automation
- Full-Stack Development

Soft Skills

- Problem Solving & Troubleshooting
- Communication & Teamwork
- Leadership from managing events team at high school

ACHIEVEMENTS & LEADERSHIP

- Completed 800+ hours of community service through the St. John Youth and Student Volunteer Army programs
- Awarded the Grand Priors Award through St. John Youth, recognizing excellence, leadership, and community service

Referees available upon request.

PERSONAL PROFILE

Penultimate-year Computer Science student majoring in Cybersecurity and Networks at Auckland University of Technology, with hands-on experience architecting and directing AI-assisted automation tools (Claude Code, OpenAI Codex, MCP-based agents) alongside secure, self-hosted infrastructure. Skilled at planning system design and ensuring AI-generated implementations are correct, secure, and production-ready. Background in troubleshooting, network configuration, and security-focused systems. Seeking an internship to apply these skills in a practical environment.

AI PROJECTS

Arbiter — Gmail Triage Agent

- Built an LLM-driven email triage bot that labels, archives, and actions inbox mail via MCP
- Directed implementation using AI coding agents; responsible for architecture, integration, and deployment

Astrolabe — Calendar Sync Agent

- Built a pipeline where an LLM reads labelled Gmail threads, extracts events/shifts, and creates them on Google Calendar
- Designed the labelling and extraction logic connecting Gmail, LLM, and Google Calendar APIs

Forge — MCP Deployment Manager

- Architected a deployment manager exposed over MCP, letting AI agents manage deployments across self-hosted servers
- Defined deployment workflows and directed implementation via AI coding agents

Almanac — Persistent AI Memory System

- Built a self-hosted memory-MCP server giving AI assistants persistent context across sessions and platforms

Technologies: Claude Code, Codex, MCP (Model Context Protocol), Docker, API integration, prompt engineering, AI-directed development

PROJECTS

Arena House Points Tracking Web Application <demo.arena.medwin.nz>

- Built a full-stack web app for tracking house points within primary and high schools
- Implemented Google OAuth authentication and role-based access control (RBAC)
- Deployed application to production using cloud hosting

Technologies: JavaScript/TypeScript, OAuth, Vercel

Self-Hosted Network Home Lab

- Infrastructure foundation supporting self-built AI automation tools (Arbiter, Astrolabe, Forge), running on a three-tier self-hosted setup (VPS, Pi, PC)
- Managed a Raspberry Pi Home Lab running various network services
- Configured Pi-hole DNS filtering and Tailscale VPN for secure remote access
- Configured and maintain Vaultwarden, Jellyfin, and Syncthing, ensuring secure authentication, media streaming, and file synchronization across a private VPN network
- Maintain a secure Network Attached Storage (NAS) system with user-based access control for backups and media services

Technologies: Linux, VPN, DNS, Docker, User-based Access Control

WORK EXPERIENCE

Technical Support Engineer (Intern) — Netcare Auckland | Nov 2023 – Jan 2024

- Provided remote technical support for clients, diagnosing software, hardware, and network issues
- Applied troubleshooting and problem-solving skills in real time
- Effectively communicated technical solutions to non-technical clients

Bartender — Shed 16 Auckland | May 2024 – Present

- Provide excellent customer service skills in a fast-paced hospitality environment
- Maintain cleanliness, organisation, and stock behind the bar
- Create cocktails and serve a range of wines and beers
